CNP has built an unmatched hosting service platform utilizing *Cloud Infrastructures* and *Real-Time Web Application Security Systems*. Our *Proven Success Processes* and a rapid response service model. Our unique approach brings the best of breed talent, technology and infrastructures to create a scalable platform for growing and managing your business online.

When you host with **CNP** Integrations we are able to not only provide the most responsive 24/7 technical and development support for your web applications but you also get our unique security protection program and a data back-up and recovery solution included in our service.

CNP integrations offers you enterprise level security and technical support in a way that allows you to be more competitive in a global marketplace and communicate with a broader audience. Open source technologies with **CNP** Integrations professional service and support combined with our new secure hosting delivers the reliability you need for managing and protecting your business assets.

You can have confidence that your systems are backed up, always on-line and that your data is protected by the best technology available in the industry. Our security team works pro-actively with law enforcement to shut down and prosecute cyber criminals. Our online strategy and support teams protect your data from cyber threats and provide quick turnaround for disaster recovery.
